

## Behind the Demand Curve...

- Consumer Theory  
Stepping back from the market...to the \_\_\_\_\_...

0

## Behind the Demand Curve...

- Utility Approach:
  - Utility = \_\_\_\_\_
  - The individual is willing to pay \_\_\_\_\_ from the purchase.
  - Utility
    - \* Total utility: \_\_\_\_\_ from consumption of a good/service
    - \* Marginal utility (MU): \_\_\_\_\_ received from consuming \_\_\_\_\_ (Total/Marginal/Average)
    - \* Eventually... \_\_\_\_\_ with consumption

1

## Consumer Theory

Buy satisfaction;  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
Willingness to pay  
falls as \_\_\_\_\_  
\_\_\_\_\_  
(Law of Demand holds)

2

## Behind the Supply Curve...

- Producer Theory
- Industrial Organization

\_\_\_\_\_

3

## Why Firms Are in Business

- Assume: Firm's goal is to maximize profit.

\_\_\_\_\_ = \_\_\_\_\_ - \_\_\_\_\_

4

## Costs: Explicit vs. Implicit

- \_\_\_\_\_ – require an outlay of money
- \_\_\_\_\_ – do not require a cash outlay (Think opportunity cost!)

5

## Economic Profit vs. Accounting Profit

- Profit
  - = total revenue minus total explicit costs
- Profit
  - = total revenue minus total costs (including explicit and implicit costs)

clq  
6

## Why Firms Are in Business

- Assume: Firm's goal is to

**Profit = Total revenue – Total cost**

**Total revenue**

= price of the good times the quantity sold

---

## What prices? What quantities?

7

## Market Structure

- Market Structure:
  - The \_\_\_\_\_ -- i.e. the environment a firm produces and sells in.
- Determined by three characteristics...

8

## Market Structure

- \_\_\_\_\_ :
  - One? A few? Lots?
- \_\_\_\_\_ :
  - Identical products? Similar? Very different?
- \_\_\_\_\_ the market:
  - Easy? Hard? Impossible?

9

## Market Structure

- “Group” like firms
- Four categories:
  - Perfect Competition
  - Monopolistic Competition
  - Oligopoly
  - Monopoly

 $10^{clq}$ 

## Market Structure – Concentration Continuum

11

### Perfect Competition

- " \_\_\_\_\_ " of firms
- \_\_\_\_\_
- \_\_\_\_\_ Entry/Exit
- Price \_\_\_\_\_ ...

12

### The Firm is the \_\_\_\_\_

...and the \_\_\_\_\_

13

### Monopolistic Competition

- \_\_\_\_\_ number of firms
- \_\_\_\_\_ Entry/Exit
- \_\_\_\_\_ product
- Advertising!
- Price \_\_\_\_\_
- Brand \_\_\_\_\_

14

### Oligopoly

- A \_\_\_\_\_
- \_\_\_\_\_ can affect the market → 
- Standardized or \_\_\_\_\_ products
- \_\_\_\_\_ to Entry
  - Entry can occur... \_\_\_\_\_ !

15

### Oligopoly

- Price Maker
  - Collusion/ \_\_\_\_\_
  - Non-price competition
  - \_\_\_\_\_
- \_\_\_\_\_ : % of output attributed to the largest firms in a market

16

### Monopoly...Characteristics

- One firm: \_\_\_\_\_ of a product
- \_\_\_\_\_ Product (no close substitutes)
- Barriers to Entry...
- Price \_\_\_\_\_ – the ability to \_\_\_\_\_ market price

17

### Why Monopolies Arise

The main cause of monopolies is **barriers to entry** – other firms cannot enter the market.

Three sources of barriers to entry:

1. Ownership of a \_\_\_\_\_ (DeBeers – diamond mines)
2. Govt gives a single firm the \_\_\_\_\_ to produce (patents, copyright laws)
3. \_\_\_\_\_ Barriers – (huge FC to operate: manuf. cars, planes; natural monopoly)

18

### Why Monopolies Arise

**Natural monopoly:** a \_\_\_\_\_ can produce the entire market equilibrium quantity \_\_\_\_\_ than could several firms.

For 1,000 homes, the **cost per unit** is lower for one firm than for two each serving 500.

19

### Competition vs. Monopoly: Demand Curves

A monopolist faces the \_\_\_\_\_.

20

### Public Policy Toward Monopolies

- Increasing competition with \_\_\_\_\_
- Regulation
- \_\_\_\_\_
- Do \_\_\_\_\_

21

Comparing Market Types					
Type of Market	Number of Producers	Kind of Competition	Barriers to Entry	Another Name for Firms	Special Traits
Monopoly	One	None	No entry possible	Price-setter	Only one firm
Oligopoly	A few	Primarily non-price competition	Medium barriers (difficult entry)	N/A	Firms can collude and behave as a monopolist
Monopolistic Competition	Many	Non-price competition; price competition	Low barriers (easy entry)	Price-maker	Product differentiation and branding
Perfect Competition	A great many	Price competition	No barriers (free entry)	Price-taker	Perfectly elastic demand
